Patent No. 6838084
GENERAL INFORMATION:
APPLICANT: Vochmus, Ingrid
APPLICANT: Vicland, John
TITLE OF INVENTION: Cytotoxic T-Cell Epitopes of the
TITLE OF INVENTION: Papilloma Virus L1-Protein and Use Thereof in Diagnosis and
TITLE OF INVENTION: Therapy
FILE REFERENCE: 50125/036001
CURRENT APPLICATION NUMBER: US/09/980,177A
CURRENT FILING DATE: 2000-05-31

Sequence 69, Application US/09980177A

Patent No. 6838084

Patent No. 6838084

GENERAL INFORMATION:

APPLICANT: Jochnums, Ingrid

APPLICANT: Nieland, John

TITLE OF INVENTION: Cytotoxic T-Cell Epitopes of the

TITLE OF INVENTION: Papilloma Virus L1-Protein and Use Thereof in Diagnosis and

TITLE OF INVENTION: Therapy

FILE REFERENCE: 50125/036001

CURRENT APPLICATION NUMBER: US/09/980,177A

CURRENT PILING DATE: 2001-11-29

PRIOR APPLICATION NUMBER: PCT/EP00/05006

PRIOR APPLICATION NUMBER: DE 19925199.1

PRIOR APPLICATION NUMBER: DE 19925199.1

PRIOR PILING DATE: 2000-05-31

PRIOR PILING DATE: 1999-06-01

NUMBER OF SEQ ID NOS: 77

SOFTMARE: PastSEQ for Windows Version 4.0

SEQ ID NO 69

LENGTH: 20

ORGANISM: Human papillomavirus type 16

US-09-980-177A-69
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          LENGTH: 20 amino acids
; TYPE: amino acid
; STRANDEDNESS: single
; TOPOLOGY: linear
; MOLECULE TYPE: peptide

ORGANISM: Artificial Sequence
FEATURE:
OTHER INFORMATION: Chimaeric protein (protein D from Haemophilius
OTHER INFORMATION: influenzae B and mutated E7 from Human papilloma
OTHER INFORMATION: virus type 16)
LENGTH: 248
